1. Document Overview

This Business Requirements Document (BRD) defines the functional and non-functional requirements for the I-Property system. I-Property is a centralized web-based platform for managing all activities related to rental properties, landlord agreements, payment processing, and tax obligations for the Property Management Division.

The system is designed to replace manual paper-based processes with a structured digital workflow. It enforces the organization's approval matrix, maintains a complete audit trail, generates automated reports, and integrates with Oracle Financial for payment execution.

2. Purpose and Scope

2.1 Purpose

The purpose of this document is to define the requirements for a system that digitizes, automates, and governs all end-to-end rental property management processes. This includes request initiation, multi-level approval workflows, agreement lifecycle management, utility and signage payment tracking, and financial reporting.

2.2 In Scope, Phase 1

- New rental request initiation and approval workflow
- Landlord and property profiling
- Contract creation, renewal, and vacated or termination processing
- Multi-level approval matrix enforcement covering Area Officer, ABH, Director, Admin Head Office, and Finance
- Rental payment management and automated payment request generation
- Utility bills payment module for Electricity, Gas, and Water including consumer number, meter number, units billed, and advance tax
- Accrual expense reports by type and area for monthly ledger recording
- Monthly advance settlement reports by type and area
- Tax calculations including Sales Tax
- Commercial value and historic value updates
- Agreement expiry notification with configurable look-ahead alerts
- Comparison reports by landlord and area
- Future rental forecast reports
- Soft copy document management for all process documents
- Role-based access control and full audit trail

2.3 In Scope, Phase 2

- Bank payment cheque cancellation processing
- Integration with the Capex system
- Signage details entry and signage payment history

2.4 Out of Scope

- Actual payment disbursement processing, which is handled entirely within Oracle Financial
- Payroll or HR systems integration
- Physical property maintenance management
- Mobile application development

3. Stakeholders

The table below lists all identified stakeholders for this initiative including sponsors, decision-makers, and subject matter experts. The Project Manager is responsible for completing the Name and Email fields before the document is circulated for review.

Name	Department	Role	Email
TBD	Finance	Sponsor (CFO)	cfo@organization.com
TBD	Admin	Business Lead	admin.lead@organization.com
TBD	Admin	Stakeholder	admin@organization.com
TBD	Finance	Stakeholder	finance@organization.com
TBD	IT	Stakeholder	it@organization.com
TBD	IT - PMO	PMO Lead	pmo.lead@organization.com
TBD	IT - PMO	Project Manager	pm@organization.com

4. Assumptions

- Oracle Financial is the system of record for all payment disbursements and ledger entries. I-Property generates and forwards payment requests to Oracle Financial and does not execute payments directly.
- Rental and tax calculation procedures defined in the current policy document will be implemented as-is. Any future policy changes will be handled through a formal change request process.
- Original physical copies of all uploaded documents will be retained and archived at Head Office.
- Module-generated reports will be used as the basis for recording expenses in Oracle Financial.
- All users will have network access to the system during business hours.
- The organization will provide an SMTP server for email notifications.
- The business team will provide finalized notification event templates and report formats before the UAT phase begins.
- Browser compatibility requirements apply to desktop environments. Mobile browser support is provided on a best-effort basis for Phase 1.

5. Constraints

- Processing turnaround time prior to Admin-level approval is subject to escalation policies defined by the business. The system will enforce configurable SLA timers for each approval stage.
- Any state-mandated changes to tax regulations will require a formal system change request. End users cannot self-configure these changes.
- Oracle Financial integration depends on the availability of Oracle Financial APIs or batch interfaces. The integration design is subject to specifications provided by the Oracle Financial technical team.
- Phase 2 features including signage, Capex integration, and cheque cancellation are out of scope for the initial delivery and will be scoped in a separate engagement.

6. Roles and Permissions

The table below defines the system roles and their associated access permissions. Role assignment is managed by the System Administrator.

Role	Permissions
Area Officer	Initiate new requests. Submit renewal and vacated requests. Enter utility bill data. View own requests only.
Area Admin	All Area Officer permissions. Print agreements. Initiate vacated requests. View area-level reports.
ABH / MR / ARH	Approve or reject requests forwarded by Area Officer. Approve monthly payment summaries. Stop specific landlord payments with mandatory remarks. View regional reports.
Director Office	Approve or reject requests forwarded by ABH. Escalate approved requests to the Admin Head Office.
Admin Head Office	Review approved requests. Input and edit property details. Mark requests as Completed. Issue vacated notices. Upload scanned documents.
Finance Department	Receive payment notifications. View comprehensive payment reports. Process payments through Oracle Financial. Stop payments as instructed.
System Administrator	Manage user accounts. Assign roles. Configure system settings. Access audit logs.

7. Functional Requirements

Each functional requirement includes a unique FR-ID, a description, measurable acceptance criteria, and a priority classification of Must Have, Should Have, or Phase 2.

7.1 New Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-NR-01	The Area Officer initiates a new request in the system. A unique reference ID is auto-generated upon submission.	The reference ID appears on screen and in a confirmation email within 5 seconds of submission.	Must Have
FR-NR-02	The system sends an email notification to ABH upon new request creation, prompting an approval action.	The email is received within 2 minutes and contains the request reference ID, a summary, and a direct approval link.	Must Have
FR-NR-03	ABH approves or rejects the request. Rejected requests must include mandatory remarks.	Rejection without remarks is blocked by system validation. The remarks field accepts a maximum of 500 characters. The status is updated to Rejected immediately.	Must Have
FR-NR-04	Approved requests from ABH are forwarded to the Director Office with a notification.	The Director Office receives an email with request details within 2 minutes of ABH approval.	Must Have

FR-ID	Requirement	Acceptance Criteria	Priority
FR-NR-05	The Director Office approves or rejects the request. Approval triggers a notification to the Admin Head Office.	The Admin Head Office email is received within 2 minutes of Director approval. The request status is updated to Pending Admin Review.	Must Have
FR-NR-06	The Admin Head Office reviews documents, inputs required details, and marks the status as Completed.	The status change to Completed triggers an automatic notification to Area Admin and Finance simultaneously.	Must Have
FR-NR-07	The Finance department receives a notification upon agreement completion to initiate payment processing.	The Finance notification contains the agreement ID, landlord ID, payment amount, and effective date.	Must Have
FR-NR-08	A full approval summary including names, roles, and dates is auto-generated and made available for printing with the agreement documents.	The summary PDF is generated within 10 seconds of final approval and includes all approvers with date and time stamps.	Must Have
FR-NR-09	A monthly payment summary is generated at month-end and requires approval from ABH or GM. An option to stop payment for a specific landlord is available with mandatory remarks.	The stop payment action requires remarks of at least 10 characters. Stopped payments are flagged in the summary report.	Must Have
FR-NR-10	Finance receives a comprehensive approved payment report listing all payments to be released for that month.	The report is exportable to Excel and PDF and contains the landlord ID, agreement ID, amount, due date, and bank details.	Must Have
FR-NR-11	Notifications are generated for all predefined events including expiry reached, approved, rejected, pending approval, and payment due.	All notification templates are defined in system configuration. The events list and formats are to be finalized by the business team before UAT.	Must Have
FR-NR-12	All unsaved changes are discarded if the user exits a form without saving. A confirmation prompt is displayed before exiting.	Browser navigation away from an unsaved form triggers a confirmation dialog. No partial data is persisted to the system.	Must Have

7.2 Renewal or Change of Ownership Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-RN-01	The system provides an Agreement Expiry Report showing agreements that are nearing expiry. Admin uses this report to initiate renewal.	The report is available in the Renewal tab. The look-ahead period is configurable with a default of 90 days. The report is exportable to Excel and PDF.	Must Have

FR-ID	Requirement	Acceptance Criteria	Priority
FR-RN-02	Area Office selects the expiring agreement and initiates a renewal request. ABH, MR, and ARH can edit details and add remarks before submitting.	Fields are pre-populated from the existing agreement. Editable fields are clearly highlighted. The remarks field is mandatory on submission.	Must Have
FR-RN-03	The renewal request follows the same approval workflow as new requests through ABH, Director, and Admin Head Office.	The same acceptance criteria from FR-NR-03 through FR-NR-07 apply. The approval chain is visible in the request audit trail.	Must Have
FR-RN-04	A new unique reference ID is generated for every renewed request.	The new reference ID is distinct from the original. Both the original and renewal IDs are cross-referenced in the system.	Must Have
FR-RN-05	Approved renewals are forwarded to the Finance department for updated payment processing.	The Finance notification includes the new lease terms, updated payment amounts, and effective renewal date.	Must Have
FR-RN-06	Rejected renewal requests are marked as Closed. ABH, MR, ARH, and the Finance department are notified.	The rejection notification is sent within 2 minutes. The request status is permanently set to Closed and no further actions are possible.	Must Have

7.3 Vacated or Termination of Agreement Request

FR-ID	Requirement	Acceptance Criteria	Priority
FR-VT-01	Area Admin initiates a termination or vacated request. The same approval chain as a new request applies.	The vacated request form captures the termination date, reason, and supporting documents. A reference ID is auto-generated.	Must Have
FR-VT-02	Upon Director approval, the Finance department is immediately and automatically notified to stop rental payments from the specified date.	The Finance stop-payment notification is generated within 2 minutes of Director approval and includes the agreement ID, landlord ID, and last payment date.	Must Have
FR-VT-03	The system automatically stops generating payment entries and expense accruals from the vacated date.	Automated payment generation is halted from the termination date without any manual intervention.	Must Have
FR-VT-04	The Admin Head Office issues a formal vacated notice and uploads the scanned copy to the system.	The uploaded document is linked to the vacated request. Upload supports PDF, JPG, and PNG formats with a maximum file size of 10 MB.	Must Have

7.4 Utility Bills Payment

FR-ID	Requirement	Acceptance Criteria	Priority
FR-UT-01	Utility bill consumer and meter details are configured during the property profiling phase per agreement.	Each agreement can have multiple utility connections. The consumer number, meter number, and type such as Electricity, Gas, or Water are stored.	Must Have
FR-UT-02	The Area Office user searches utility bill details by Agreement ID or Landlord ID and selects the bill type.	Search results are returned within 2 seconds and display existing utility connections for selection.	Must Have
FR-UT-03	The user inputs the bill period, units consumed, bill amount, and advance tax, then uploads the bill document.	All fields are validated on submission. The bill amount and advance tax accept up to 2 decimal places. The file upload limit is 10 MB.	Must Have
FR-UT-04	Submitted utility bills are routed to ABH for approval. Finance is notified upon ABH approval for payment processing.	ABH receives a notification within 2 minutes. The Finance notification includes the bill ID, amount, and payment due date.	Must Have
FR-UT-05	A utility bill payment report is available and can be filtered by area, landlord, agreement, bill type, and period.	The report is exportable to Excel and PDF. Data is available within 24 hours of bill entry.	Must Have

7.5 Signage Payment (Phase 2)

FR-ID	Requirement	Acceptance Criteria	Priority
FR-SG-01	The user inputs signage information including Landlord ID, signage size, rate per square foot, and agent or collector name.	Multiple signage records are supported per landlord. All fields are mandatory except the collector name.	Phase 2
FR-SG-02	For signage payment, the user selects a landlord ID, views all associated signage records, and selects the relevant one.	All signage records for a landlord are displayed in a list view. The selected record is highlighted for confirmation.	Phase 2
FR-SG-03	The user enters the payment period and tax amount, uploads the bill, and saves the transaction.	The transaction is saved with a unique signage payment ID. Duplicate payments for the same period are blocked by validation.	Phase 2
FR-SG-04	A signage payment report is available and can be filtered by landlord, period, and agent.	The report is exportable to Excel and PDF.	Phase 2

7.6 Reports

FR-ID	Requirement	Acceptance Criteria	Priority
FR-RP-01	An automated monthly payment report is generated at month-end and requires ABH approval. ABH has the option to stop payment for specific landlords.	The report is auto-generated on the last working day of the month. ABH is notified by email. The report is locked for editing after approval.	Must Have
FR-RP-02	Monthly expense recording reports covering payments and advance settlements are available for Oracle Financial ledger entries and can be filtered by type and area.	Reports cover accrual and advance settlement entries and are exportable in an Oracle Financial compatible format.	Must Have
FR-RP-03	Approval reports showing pending and completed approvals are available for Admin and ABH users.	Reports can be filtered by date range, status, and approver, and are exportable to Excel and PDF.	Must Have
FR-RP-04	Future forecast and projection reports are available for upcoming rental payments and agreement renewals.	The forecast period is configurable at 3, 6, or 12 months and is based on current agreements and historical rental escalation rates.	Should Have
FR-RP-05	A weekly agreement expiry notification report lists agreements expiring within the configurable look-ahead window.	The default look-ahead period is 90 days. The report is emailed weekly to Admin and is also available on demand through the Reports module.	Must Have
FR-RP-06	Utility, signage, and other expense reports are accessible to authorized roles only.	Access is controlled by role. Finance and Admin users can view all data. Area Officers can only view data for their own area.	Must Have
FR-RP-07	An Agreement Renewal and Vacated report shows the status and history of all such requests.	The report can be filtered by area, date range, and status. It includes both the original and renewal reference IDs.	Must Have
FR-RP-08	A commercial value history report shows historic and current commercial property values per agreement.	The report provides an audit trail of all commercial value updates with the date, old value, and new value.	Should Have

8. Non-Functional Requirements

ID	Category	Requirement and Acceptance Criteria	Priority
NFR-01	Performance	The system supports up to 100 concurrent users without performance degradation. The average page	High

ID	Category	Requirement and Acceptance Criteria	Priority
		load time does not exceed 3 seconds under normal load.	
NFR-02	Availability	The system maintains 99.5% uptime during business hours from 08:00 to 20:00. The Recovery Time Objective is 1 business day following an outage.	High
NFR-03	Authentication	All users authenticate via the organization SSO or LDAP. Sessions time out after 30 minutes of inactivity. Accounts are locked after 5 failed login attempts.	Critical
NFR-04	Authorization	Role-based access control is implemented. Each user role can only access the screens and data permitted for that role.	Critical
NFR-05	Data Backup	Full data backups are performed daily and retained for a minimum of 90 days. The Recovery Point Objective is 24 hours.	High
NFR-06	Audit Trail	All create, update, delete, and sensitive read actions are logged with the user ID, timestamp, and before and after values. Logs are tamper-proof.	High
NFR-07	Browser Compatibility	The application is compatible with the last three major versions of Chrome, Firefox, and Edge. Internet Explorer 11 is the minimum legacy browser requirement.	Medium
NFR-08	Data Encryption	All data in transit is encrypted using TLS 1.2 or higher. Sensitive fields such as bank details are encrypted at rest using AES-256.	Critical
NFR-09	Scalability	The architecture supports horizontal scaling to accommodate a 50% increase in user load without code changes.	Medium
NFR-10	Usability	Core workflows including new request, renewal, and utility payment are completable in fewer than 10 screen interactions. Inline validation messages are displayed throughout.	Medium

9. Integration Requirements

The integrations listed below are required for Phase 1. Detailed technical specifications including field mappings, API contracts, and error handling will be documented in a separate Integration Design Document prepared by the IT team.

System	Integration Type	Direction	Description
Oracle Financial	API or Batch File	i-Property to OF	Payment requests, expense booking entries, and advance settlement reports are transmitted to Oracle Financial for processing. Utility and signage payment data is pushed upon ABH approval.

System	Integration Type	Direction	Description
Oracle Financial	API	OF to i-Property	Payment confirmations and transaction reference numbers are received from Oracle Financial to update the request status in i-Property.
Email and Notification Server	SMTP	i-Property to Users	System-generated email notifications are sent for all approval events, expiry reminders, rejections, and payment confirmations.
Document Storage	File System or Object Store	Bidirectional	Scanned agreements, utility bills, and vacated notices are stored in and retrieved from a central document repository.

10. Data Requirements

10.1 Data Entities

- Landlord Profile: Landlord ID, Name, State ID Number, State ID Issue State, State ID Expiry, contact details, bank account details, and Tax ID.
- Property Profile: Property ID, address, area, type, linked Landlord ID, commercial value, and utility connections.
- Agreement: Agreement ID, reference ID, Landlord ID, Property ID, start date, end date, rental amount, tax rate, escalation clause, status, and document attachments.
- Request: Request ID, type (New, Renewal, or Vacated), status, initiator, current approver, approval history, remarks, and timestamps.
- Utility Bill: Bill ID, Agreement ID, bill type, period, units consumed, amount, advance tax, uploaded document, and payment status.
- Payment Record: Payment ID, Agreement ID, period, amount, tax, net payable, status, and Oracle Financial transaction reference.
- Notification Log: Event ID, event type, triggered by, recipients, timestamp, and delivery status.

10.2 Data Retention

- All agreement and payment records are retained for a minimum of 7 years in accordance with financial record-keeping requirements.
- Audit logs are retained for a minimum of 3 years.
- Archived data remains accessible in read-only mode through the system for the full retention period.

11. Notification Events

The events listed below trigger automated system notifications. Notification templates and recipient lists are to be finalized by the business team and configured in the system before UAT begins.

Event ID	Event Description	Recipients	Channel
NE-01	New request submitted by Area Officer	ABH	Email
NE-02	Request approved by ABH	Director Office	Email

Event ID	Event Description	Recipients	Channel
NE-03	Request rejected by ABH	Area Officer	Email and In-App
NE-04	Request approved by Director Office	Admin Head Office	Email
NE-05	Request rejected by Director Office	ABH and Area Officer	Email and In-App
NE-06	Request marked Completed by Admin Head Office	Area Admin and Finance	Email
NE-07	Monthly payment summary ready for approval	ABH or GM	Email
NE-08	Payment summary approved and payments ready for release	Finance	Email
NE-09	Agreement expiry within the look-ahead window, default 90 days	Admin and ABH	Email, Weekly
NE-10	Vacated request approved by Director	Finance	Email, Urgent
NE-11	Utility bill submitted and pending ABH approval	ABH	Email
NE-12	Utility bill approved by ABH	Finance	Email
NE-13	Payment stopped for a landlord	Finance and ABH	Email and In-App
NE-14	Approval SLA breached, pending beyond configured threshold	System Admin and Manager	Email and In-App

12. Process Flows

Detailed process flow diagrams for New Request, Renewal, Vacated, and Utility Bill processes are to be attached as separate appendix exhibits. The steps below describe the as-designed system process for each flow.

12.1 New Request Flow

- The Area Officer submits a new request. The system generates a reference ID and notifies ABH.
- ABH reviews the request and either approves it, which forwards it to the Director, or rejects it with mandatory remarks. The Area Officer is notified of a rejection.
- The Director Office reviews the request and either approves it, which notifies the Admin Head Office, or rejects it, which notifies ABH and the Area Officer.
- The Admin Head Office reviews the documents, inputs the required details, and marks the request as Completed. Area Admin and Finance are notified.
- Area Admin prints the agreement with the approval summary. Finance initiates the payment in Oracle Financial.
- At month-end the system generates the payment summary. ABH reviews and approves it with the option to stop individual payments. Finance releases the approved payments.

12.2 Renewal Request Flow

- Admin generates the expiry report. Area Office identifies expiring agreements and initiates a renewal request.
- ABH, MR, or ARH edits the details, adds remarks, and submits the renewal request.
- The renewal follows the same approval chain as a new request as described in Section 14.1 Steps 2 through 6.
- If the request is rejected at any stage it is marked as Closed and all relevant parties are notified.

12.3 Vacated and Termination Flow

- Area Admin initiates a vacated request with the termination date and supporting documents.
- The request follows the same approval chain as a new request through ABH, Director, and Admin Head Office.
- Upon Director approval the Finance department is immediately notified to stop payments. The system stops generating automated payment entries from the termination date.
- The Admin Head Office issues a formal vacated notice and uploads a scanned copy to the system.

13. Acronyms

Acronym	Definition
ABH	Area Business Head
MR	Manager Retail
ARH	Area Regional Head
OF	Oracle Financial
HO	Head Office
IE	Internet Explorer
PMO	Project Management Office
IT	Information Technology
CFO	Chief Finance Officer
BRD	Business Requirements Document
ID	Identifier
NFR	Non-Functional Requirement
SLA	Service Level Agreement
RBAC	Role-Based Access Control

14. Stakeholder Sign-Off

14.1 Prepared By

Name and Role	Department	Signature	Date
Business Analyst, IT-PMO	IT-PMO		
Head of Enterprise Architecture	IT-PMO		

14.2 Approved By

Name and Role	Department	Signature	Date
Manager Real Estate	Admin		
Senior Manager Finance	Finance		
Head Business Systems	IT		
Head of Internal Audit	Audit		
Head of Legal	Legal and Finance		

By signing this document, stakeholders confirm that the requirements described herein accurately represent the business needs and that they approve this document as the baseline for system development.
